

RUBBER BUSHINGS BY IL MOTORSPORTS M13-9812X

Thanks for purchasing our rubber suspension bushings for your Miata. If you have any questions during installation or suggestions for improvement to the product or the instructions - please don't hesitate to call or email.

It is the best practice to install these bushings one control arm at a time, using the original bushings as a reference to guide you as to where and how each new bushing is to be installed. It is also a good idea to keep the bushings in their respective packaging until ready to install. Many of the bushings look very similar and it is an easy mistake to select the wrong bushing for a particular location. If any of your bushings have been mixed, here is a breakdown by part numbers of the various rubber suspension bushings to identify where they go. The part numbers can be found cast onto one end of each bushing.

Front upper control arms

- 8538 - all positions

Rear upper control arms

- 8539 - all positions

Front lower control arms

- 8277 - front bushings
- 8278 - rear bushings

Rear lower control arms

- 8540 - outer bushings (upright attachment)
- 8541 - inner bushings (subframe attachment)
